

Navigating the process for accessing medical and behavioral health services for the children and families we serve can sometimes be confusing and difficult. We would like to be a resource for you in that process!

**Did you know that TennCare can help you find a provider for medical and behavioral health services for your children and youth?**

If you need assistance locating an available TennCare service provider you can contact the SelectKids Line at **1-888-422-2963**. If you have a more complex case with significant medical or behavioral health concerns to navigate or you have a child that will be going out-of-state and needing care coordination, you can call **1-888-416-3025** and have a Medical or Behavioral Health Case Manager assigned to your child to help access the services and providers that they need.
